Microcement ready to use

in paste

Premium decoration for your projects, thanks to the new paste microcement, we have achieved a much more efficient and easy-to-apply product

- High performance microcement for vertical use
- Finish continued seamless
- Unlimited decorative possibilities for walls and furniture
- Quick application
- Innovative protection treatment with polyurethane cream

Microcement Fluid

Paint

New format in fluid version, for the application of cement decorations in the most practical and simple way

-  - One component liquid microcement for a rapid application
-  - Finished without joints
-  - Fast application, designed to be applied by brush, roller or spray
-  - Primer + Fluid microcement + polyurethane cream

Self-leveling microcement

High thickness

Innovative system for creating high thickness of continuous flooring with microcement finishes.

- 2 in 1, high thickness with microcement finish.
- Fast execution, thickness from 3 to 30 mm.
- Maximum technical performance with natural finishes.
- Wide range of colors.
- APPLUS certified system.

Micro Cal

Lime base

Tradition and avant-garde go hand in hand with this new coating concept. Possibility of creating lime finishes, giving naturalness and sustainability to your projects.

- High quality specialized decoration
- Natural and primary finish

MicroX

Continuous surfaces
of the latest generation.

The MICROX family means evolution. Maximum technical performance in a continuous decorative cementitious coating.

We have managed to combine the most extreme properties of compression and scratch resistance to an industrial finish with the naturalness and elegance of a decorative coating.

MicroX MD

Continuous decorative floor
with mineral finishes

MicroX METAL

Continuous decorative floor
with metallic finishes

MicroX WR

High decoration in wet areas
(bathrooms, Jacuzzi, spa ...)

MicroX 3C

Continuous decorative floor
with extreme hardness

MicroX Pro

Continuous flooring of
maximum hardness for high
traffic area

OXIDES

Precise metal oxidation system, that allows us to imitate natural oxidation process to which metals are subjected over the time, obtaining incredibly realistic finishes.

Its industrial soul, the unrepeatable texture created by the unique reactions generated in each individual case, its versatility and good behavior when combined with other material ensure the system with a high decorative level.

Sand Tropical dream

Ideal for creating artificial beaches with natural finishes

Color range

Cancún

Ibiza

Agadir

Bali

- Decorative system optimized for swimming pool lining.
- Polyurethane coated silica, non-heat, non-porous and with high chemical resistance.
- Continuous seamless finish with a soft touch.
- Unlimited possibilities in swimming pools design and modeling of artificial beaches.

APPLUS certified system

Microglass

Live nature

Create your own magical space with natural reflections of nature

- Decorative system for covering swimming pool tubs.
- Crystallization in contact with humidity.
- Continuous, cementitious finish (natural stone) that is smooth or sandblasted, without joints.
- Unlimited possibilities in swimming pool design and modeling.
- Light color chart.

TechSol Water

System

New innovative and exclusive system, developed to improve the treatment of pool water. Thanks to its properties we achieve ecological waters, without the use of chemicals, and substantial savings throughout the year.

- Reduction or elimination of the use of chemical products, with savings of up to 100%.
- Natural regulation of the pool's Ph with its zeotherm filter medium.
- We trap heavy metals and eliminate lime.
- We completely eliminate sunscreens from the water.
- We manage to trap 100% of the particles, obtaining water with greater transparency.
- Reduction of washing water.

System composition:

- **ZEOTHERM:** natural filter medium, which is introduced into the pool filter.
- **TS REACTOR:** advanced water purification system without the use of chemicals.
- **IONIZER:** copper ion system for disinfection and anti-algae treatment in swimming pools.
- **PHOTOCOAT:** advanced photocatalytic nanolayer for the protection and disinfection of pool surfaces.
